CORNELIA HAENER, MD
A MESSAGE FROM YOUR CHIEF
EXECUTIVE AND CHIEF MEDICAL
OFFICER

As we step into 2025, I want to take a moment to reflect on the incredible progress Sonja Kill Memorial Hospital has made over the past year. Since our founding in 2012, we have worked tirelessly to become the premier healthcare provider in southern Cambodia, with a special focus on children and expectant mothers. Today, we stand stronger than ever, driven by our commitment to high-quality, compassionate care, innovation, and medical excellence.

In 2023 and 2024, we achieved significant milestones that continue to shape our hospital's future. Our efforts toward accreditation under the Cambodian Hospital Accreditation Standard (CHAS) have strengthened our quality of care,

teamwork, and patient experience.

We expanded our maternal and pediatric services, introduced pediatric outreach programs to health centers, and enhanced our trauma and surgical capabilities. The launch of our Pediatric Surgery and Gastroenterology Center marks another step forward in offering specialized care to our community.

Beyond medical advancements, our financial sustainability model continues to prove that high-quality care can be accessible to all. Despite an increase in subsidies for underprivileged families, we successfully balanced operational costs through revenue from patients who can afford private care. This model ensures that SKMH remains a beacon of hope for those in need while maintaining long-term sustainability.

Looking ahead to 2025, we will focus on further strengthening our hospital operations, expanding specialized services, and deepening our commitment to staff well-being.

Our transition to electronic health records is enhancing efficiency, while continuous investment in infrastructure and medical equipment is ensuring the best possible care for our patients.

At the heart of our success is our dedicated team. Each of you plays a vital role in making SKMH the trusted institution it is today. Your commitment to patient-centered care, collaboration, and innovation is what sets us apart. As we move forward, let's continue striving for excellence, embracing new opportunities, and reinforcing our culture of compassion and respect.

Thank you for your hard work, dedication, and unwavering belief in our mission. Together, we will continue to shape the future of healthcare in Cambodia.

HIGHLIGHTS OF SKMH PROGRESS AND GROWTH

Obstetrics Department Update

Obstetric Department Statistics – Post Covid-19

The department had 950 deliveries in 2022. The Cambodian team of doctors and midwives was faced with increasing competition by private providers who catered more to customers' demands. At the beginning of the year, activity was very low. A quality improvement project focused on customer services in the Women's Health Clinic and the maternity wing. As a result, the number of deliveries increased in the second half of the year by 47 % compared to the first six months. In addition, the department was a sought-after referral site for difficult deliveries and cases of postpartum bleeding due to our well-functioning blood bank. Many lives have been saved thanks to the hospital's blood bank.

Following severe bleeding, she was transferred from another hospital to Sonja Kill Memorial Hospital, where the medical team acted swiftly, providing urgent and professional care that ultimately saved her life.

HOSPITAL STAFF AND VOLUNTEERS STEP IN TO

DONATE LIFE-SAVING BLOOD

In Keo Krasang Village, Kep Province, a 44-year-old widow and housewife faced a life-threatening situation while pregnant, putting both her life and that of her unborn child at risk. She has two children, a son and a daughter, but due to severe financial hardship, her son has been unable to receive a proper education. Additionally, a few months ago, her eldest son was involved in a traffic accident while working to support the family.

Currently, she and her children do not have a home of their own and are living with her younger sister's family. They rely on scavenging for recyclable materials to sustain their livelihood. On top of these challenges, she suffers from multiple chronic illnesses, making it difficult for her to find stable employment.

While her eldest son was recovering from the accident, she was deeply worried as a mother. After dedicating her time to caring for him, she discovered that she was already five months pregnant.

Determined to protect her unborn child, she followed the doctors' advice to maintain her health. However, tragically, the baby did not survive and passed away at birth.

Update for the Sonja Kill Memorial Hospital NEONATAL ICU

ANOTHER VICTORY FOR THE NEONATAL INTENSIVE CARE UNIT

Mother: Pok Sreytom

The Neonatal Intensive Care Unit (NICU) at Sonja Kill Memorial Hospital is a bright light to many parents whose newborn babies are born premature or sick. It is the only neonatal intensive care unit for many miles and features

"Without Sonja Kill Memorial Hospital, I Would Have Lost My Only Child."

Ms. Pok Sreytom hugged her baby tightly, smiling with relief after enduring the storm of life during and after childbirth. At 36 years old, she had finally conceived for the first time. Due to financial hardship and malnutrition, she went into labor prematurely at just 26 weeks and gave birth at another hospital. Although the delivery was successful, her baby weighed only 800 grams and was in critical condition.

Doctors at that hospital advised her to take the fragile newborn to Sonja Kill Memorial Hospital. As newcomers to Kampot, Ms. Pok Sreytom and her 74-year-old husband, a foreigner, had never heard of the hospital before. They worried about the quality of medical care and the potential costs, but with no other choice, they made the journey in hopes of saving their baby. Upon arrival, their fears were quickly put to rest. The baby was placed in an incubator for two months, receiving specialized neonatal care from the dedicated medical team. Under their careful supervision, the infant grew stronger and gained weight, reaching 2,390 grams. Their experience turned out to be the complete opposite of what they had feared. From the moment they stepped into the hospital, they felt the kindness and compassion of the staff.

"Without Sonja Kill Memorial Hospital, I would have lost my only child," said Ms. Pok Sreytom. "You have not only saved my son but have shown compassion to my family, without discrimination against our livelihood or nationality. I hope that when my son grows up, he will become a good doctor—one who helps the needy and serves society, just like the doctors at Sonja Kill Memorial Hospital."

EMPLOYEE SPOTLIGHT #1**Dr. Tan Poseng: Leading Innovation and Excellence in Internal Medicine**

Dr. Tan Poseng, Chief of Internal Medicine and Head of the Outpatient Department (OPD), has been an integral part of Sonja Kill Memorial Hospital (SKMH) since 2013. Over his 11-year journey with SKMH, he has been driven by the hospital's dedication to professional growth and its role as a training center for medical excellence.

In late 2023, Dr. Poseng spearheaded the establishment of the hospital's Gastroenterology (GI) Department, marking a significant milestone in specialized digestive healthcare for the community. Passionate about both treating patients and educating them on healthcare, he dedicated nearly six months in 2024 to external gastroenterology training. This investment in professional development has enhanced SKMH's ability to manage gastrointestinal conditions, providing direct benefits to the local population.

Under Dr. Poseng's leadership, the medical team remains committed to SKMH's vision and mission, ensuring continued success. He emphasizes the importance of trust and clear communication in fostering teamwork, particularly in the collaboration between doctors and nurses. The introduction of the GI Department has brought advanced medical technologies and protocols to the hospital, with specialists volunteering their expertise to elevate patient care standards.

One of the key challenges Dr. Poseng identifies is the lack of health education among patients, which necessitates dedicated time for education to improve health outcomes. Looking ahead, he advocates for more external training opportunities and the recruitment of additional staff to further enhance service quality.

Dr. Poseng takes great pride in contributing to the hospital's esteemed reputation and envisions his role expanding to support the Cambodian Hospital Accreditation System (CHAS) and the ongoing development of the GI Department.

His message to the community, donors, and patients is one of gratitude and encouragement. He urges individuals to prioritize their health and expresses deep appreciation to donors for their invaluable contributions to healthcare in Kampot. Inspired by SKMH's mission to serve the community, Dr. Poseng remains committed to making a lasting impact on patient care.

EMPLOYEE SPOTLIGHT #2

KOMSAN VANDIN

Head Department Nurse OPD

Komsan Vandin, a devoted mother of two, has been an integral part of the Sonja Kill Memorial Hospital (SKMH) since 2018. Over the past seven years, her journey has been marked by dedication, growth, and an unwavering commitment to patient care. Starting as a nurse in the Emergency Department, Vandin has risen to become the Head Nurse of the Outpatient Department (OPD), a role she holds with immense pride and responsibility.

For Vandin, SKMH is more than just a workplace. "What keeps me here is the hospital's support for women like me. As a mother, having access to the on-site daycare center has been invaluable," she shared. Beyond the practical benefits, the hospital's mission and vision deeply resonate with her. "Being part of a non-profit hospital allows me to provide care to all patients, regardless of their ability to pay. That's something I truly love about my work."

Teamwork and continuous learning have been at the heart of her experience at SKMH. In 2024, she embraced new challenges, including training new staff and developing departmental policies to meet the Cambodia Hospital Accreditation Standards (CHAS). "Writing policies and improving standards isn't just paperwork—it's about making sure our patients get the best care possible. Leading my team through these changes has been demanding but rewarding," she said.

The support from international nurse volunteers and ongoing training opportunities have also been instrumental in helping her and her team grow professionally. She hopes for more external learning opportunities to further develop her team's skills.

To the hospital community and donors, Vandin expressed heartfelt gratitude. "Your support allows us to serve patients in need and empowers female staff like me. I'm grateful for the trust patients place in us and the management's efforts to help the poor and support working mothers."

Her daily motivation comes from SKMH's mission and the sense of purpose it brings.

"Knowing that I'm part of a team making a difference in people's lives—that's what drives me every day." - Komsan Vandin

EMPLOYEE SPOTLIGHT #3

NOUN LONGDY
Appointed
Technical Manager

For 15 years, Mr. Noun Longdy has been the quiet force behind the smooth operations at Sonja Kill Memorial Hospital (SKMH). Born and raised in Kampot, Longdy's journey began long before the hospital's buildings stood tall. As the Technical Manager, his responsibilities extend far beyond his title. "My role is to manage and oversee the hospital's electrical and water systems, ensuring everything functions without interruption so that medical teams can focus on patient care without worrying about infrastructure issues. If the electricity fails or equipment breaks, it directly affects patient care, especially in emergencies," he emphasizes.

Reflecting on 2024, Longdy is proud of his team's collective achievements. His department played a pivotal role in maintaining hospital operations, drafting essential maintenance policies, and supporting major initiatives like the CHAS campaign. Challenges are a constant part of his work, but he meets them with dedication and quick thinking. "There are times when equipment fails unexpectedly, but our priority is always to respond quickly and safely to prevent disruptions in patient care," he says. Over the years, these challenges have become valuable learning experiences.

Looking to the future, Longdy envisions growth for his team. "I want to share my experiences with the younger generation, helping them develop the skills needed to support both staff and patients effectively," he explains.

"I started here as an electrician, and each obstacle has helped me grow stronger and gain valuable knowledge." - Noun Longdy

He also hopes for more opportunities for technical training and additional staff to meet growing demands.

When asked what motivates him daily, Longdy's answer is simple yet profound: "The hospital's mission to help the poor, especially mothers and children, keeps me going. Knowing my work plays a part in their care is deeply fulfilling."

"He extends heartfelt gratitude to the management team and donors: "Thank you for your leadership and support. The equipment and resources you provide make our work possible and improve patient care."

Mr. Longdy's story is a testament to dedication, teamwork, and the often-unseen efforts that keep Sonja Kill Memorial Hospital running seamlessly. His commitment ensures that every patient receives care in a safe and supportive environment—proof that even behind the scenes, heroes are hard at work.

CHAS Progress

Sonja Kill Memorial Hospital is dedicated to delivering high-quality healthcare services that meet international standards. In pursuit of this goal, we have actively engaged in the Cambodian Hospital Accreditation process, which aims to enhance patient safety, healthcare quality, and operational efficiency across medical institutions in Cambodia.

Progress and Achievements at Sonja Kill Memorial Hospital

Since embarking on the accreditation journey, Sonja Kill Memorial Hospital has made significant progress, including:

- **Enhanced Patient Safety Protocols:** Implementing stringent safety measures and infection control practices to safeguard patient health and well-being.
- **Quality Improvement Initiatives:** Regular audits and performance evaluations to ensure compliance with national healthcare standards.
- **Staff Training and Development:** Ongoing education programs to equip our team with the latest knowledge and best practices in healthcare delivery.
- **Infrastructure and Facility Upgrades:** Modernizing our facilities to provide a safe and comfortable environment for patients and staff.

Challenges and Solutions

The journey toward accreditation has presented some challenges, including:

- **Resource Allocation:** Balancing financial and human resources to meet accreditation demands. We have addressed this by optimizing operational processes and prioritizing critical areas.
- **Change Management:** Encouraging staff to adapt to new procedures and standards. Through effective communication and leadership support, we have fostered a culture of continuous improvement and accountability.

Future Plans and Vision

Sonja Kill Memorial Hospital is committed to achieving full accreditation and maintaining excellence in healthcare services. Our future plans include:

- **Continuous Quality Improvement:** Regularly reviewing and updating policies and procedures to reflect evolving healthcare standards.
- **Community Engagement and Education:** Promoting health awareness programs to enhance community well-being and preventive care.
- **Expanding Services:** Introducing more specialized services while ensuring compliance with accreditation guidelines.

The progress of Cambodian Hospital Accreditation at Sonja Kill Memorial Hospital demonstrates our unwavering commitment to quality and safety in healthcare. We believe that meeting these standards not only enhances patient trust but also contributes to the overall development of the healthcare system in Cambodia. We extend our gratitude to our dedicated team, patients, and community partners who have supported us throughout.

GI Department

In late 2023, Sonja Kill Memorial Hospital proudly expanded its medical services with the launch of the Gastrointestinal (GI) Department. This significant development is a testament to our commitment to providing exceptional patient care and addressing the growing healthcare needs of our community.

Recognizing the increasing demand for specialized digestive health services, the hospital established the GI Department to offer comprehensive diagnostic and therapeutic care for patients with gastrointestinal conditions. Our mission is to deliver high-quality, patient-centered care by combining advanced medical technology with the expertise of skilled specialists.

The GI Department is equipped with state-of-the-art endoscopy units, advanced imaging systems, and modern diagnostic tools to ensure accurate assessments and effective treatments. Our facilities include:

- Endoscopy suites designed for both upper and lower GI procedures
- Comfortable recovery areas that prioritize patient safety and comfort

Our dedicated team, consisting of highly skilled gastroenterologists, endoscopy nurses, and support staff, is committed to providing compassionate care. Continuously trained in the latest GI procedures, our specialists maintain their expertise through ongoing education and collaboration with leading medical institutions. The GI Department offers a full range of services, including:

- Diagnostic endoscopy (upper GI endoscopy, colonoscopy)
- Therapeutic procedures (such as polyp removal and variceal banding)

Since its opening in early 2024, the GI Department has already made a meaningful impact, successfully:

- Treating [111] patients with a variety of gastrointestinal conditions
- Performing [80] endoscopic procedures with high safety and success rate

By providing these specialized services locally, we've enhanced access to critical healthcare for our community, reducing the need for patients to travel long distances for care. As we continue to grow, Sonja Kill Memorial Hospital remains dedicated to expanding our specialized services, ensuring quality healthcare is accessible to all.

EMERGENCY MEDICINE DEPARTMENT HIGHLIGHTS

Dr. Kuoy Sopheak,

Senior Resident in the ED/IPD of SKMH

In 2024, the Emergency Medicine Department continued its important role in providing 24/7 life-saving care. Dr. Kuoy Sopheak, Senior Resident in the ED/IPD, highlighted the department's major achievement—the introduction of a short ICU care unit, which improved patient management and critical care transitions. The department also experienced a rise in patient volume due to faster evaluations, improved management, strong teamwork, and the use of advanced medical equipment such as ventilators and defibrillators.

Common emergencies treated included respiratory illnesses (pneumonia, COPD), cardiovascular conditions (stroke, myocardial infarction), gastrointestinal issues (AGE, gastritis, appendicitis), pediatric cases (URI, pneumonia), and trauma injuries (fractures, head trauma).

While the department made significant progress, challenges remained, particularly in managing critically ill patients while addressing concerns from anxious family members. This was resolved through teamwork, communication, and multidisciplinary collaboration.

A notable success story this year was a critically ill patient who arrived in severe condition. Thanks to the department's swift response, advanced equipment, and expert care, the patient was stabilized and recovered successfully—a testament to the team's dedication and efficiency.

To enhance emergency care, staff participated in BLS, ACLS, ATLS, and emergency training programs, ensuring continuous skill development. Additionally, new medical equipment improved response times and patient outcomes, though further resources are still needed. Looking ahead, Dr. Sopheak emphasized strengthening the triage system, teamwork, and critical care programs, while also improving professionalism, leadership structure, and emergency case prioritization. With these advancements, the department remains committed to delivering high-quality emergency care and saving lives.

In the face of urgency, we stand strong saving lives, offering hope, and making every second count.

MEDICAL VOLUNTEERS RETURN TO SKMH

The Return of Medical Volunteers: Renewed Commitment to Care

After a period of global uncertainty, the return of medical volunteers to Sonja Kill Memorial Hospital in 2023-2024 marked a powerful renewal of our mission: A Non-Profit Hospital and training center that improves the health of families and their communities by delivering high-quality, patient-centered care, regardless of their ability to pay but also strengthens local medical teams through training, collaboration, and knowledge exchange.

These dedicated professionals—from Surgeon, Emergency medicine, Pediatrician, OB/GYN, Nurses, general practitioners to public health specialists—brought fresh expertise, innovative techniques, and compassionate service. With their support, we expanded key programs, increased medical capacity, and improved community outreach.

Impact Highlights:

- **Expanded Services:** Volunteer doctors helped increase the number of specialized procedures and patient consultations.
- **Training & Knowledge Sharing:** International volunteers conducted hands-on training for local healthcare professionals, fostering skill development.

Their return has reaffirmed our commitment to excellence and has inspired the next generation of healthcare workers at Sonja Kill Memorial Hospital. As we look ahead, we continue to welcome the invaluable contributions of these selfless individuals who make a lasting difference in the lives of our patients.

Dr. Donna Venezia, Emergency Medicine, USA

VOLUNTEERS MAKE A DIFFERENCE AT SKMH

SKMH welcomed several volunteers from all parts of the world in 2022. This enables SKMH to expose Cambodian staff to international best practice. As the reputation of quality compassionate care at SKMH continues to grow around the world, we are receiving numerous applications from medical and nursing students requesting internships. Many of these young international people are inspired to return to SKMH after finishing studies to provide additional training to our staff. An increasing number of new volunteers such as physicians, nurses and midwives are requesting to assist in education and training of the Cambodian doctors, nurses and midwives in 2023 2024.

BOARD MEETING

In November 2024, the Board of Directors of Sonja Kill Memorial Hospital convened to review progress, set goals, and strategize for the coming year. These meetings play a pivotal role in shaping the hospital's vision and ensuring our mission to provide affordable, quality healthcare to all continues to flourish.

"2024 has been a year of growth and transformation for our hospital. The achievements we've made are a testament to the dedication of our team and the support of our community,"

The board outlined a roadmap for the hospital's continued growth, including:

- **Facility Upgrades:** Plans for constructing a new outpatient wing to reduce wait times and enhance patient comfort.
- **Training Programs:** Expanding training opportunities for local healthcare professionals to build capacity in rural healthcare delivery.

The board reviewed the hospital's financial health, ensuring that resources are utilized efficiently to support both current operations and long-term goals. Donor contributions and grants were highlighted as vital components of our ongoing success. The board expressed gratitude to all supporters who make our work possible.

"Every dollar we receive is a step toward improving lives. Our financial planning is always guided by a commitment to transparency and impact,"

Sonja Kill Memorial Hospital continues to be the premier healthcare provider of choice for the whole family, especially children and expectant mothers, as the trusted partner in the South of Cambodia. Doctors, midwives and nurses alike value ongoing training in every department. This is only possible because of donors and volunteer's generosity. Teaching, training, donated equipment and financial generosity is greatly utilized to improve the lives of Cambodian patients and also to build capacity for future generations.
